Teacher Classroom Cleaning Instructions During Class Hours

Please clean surfaces by removing any soils or build up on surface area first with wet towel.

The proper way to use the Bioesque Disinfectant:

- Place the nozzle of your spray bottle in the **MIST** position
- **MIST** the entire surface to be disinfected
- Allow product to sit for 4 minutes for proper dwell time. Product does not need to be wiped after 4 minutes.

If this procedure is not followed, then time and money may be wasted, and most importantly we are not effectively sanitizing for COVID-19.
