

# **FLU/VIRUS PROTOCOLS**

## **Teacher Cleaning Responsibilities:**

- ◆ Teachers will be using *Bioesque*.
- ◆ This is a food safe product.
- ◆ This product is for classroom tables/desks, shared countertops and chairs only.

## **Instructions For Cleaning**

- ◆ *Bioesque* should be sprayed during class changes as well as **before** breakfast and **before** lunch (if they will be eating in these areas.)

\*Teachers need to **only** spray the desk before students arrive for breakfast.

\*Desk should be sprayed again before lunch while students are washing their hands or on restroom break.

- ◆ This product has a four-minute dwell time and should not be wiped. (This means it takes 4 minutes of sitting to “disinfect” the area.)
- ◆ Teachers will need to lightly mist the desk, chair, or countertops. If done correctly, in 4 minutes it should be dry. If it is still wet, then too much *Bioesque* has been used.

◆*Bioesque* should never be diluted.

- ◆ *Bioesque* is a Botanical “Disinfectant” and **should NOT be used as a cleaner.**

- ◆ During breakfast and lunch, custodians will leave a bucket of Suprox/Alpha HP on a cart in the hall for food/mess clean up

- ◆ For Musical instruments, shared items and gym equipment spray *Bioesque* on a paper towel and then wipe off item. Do not spray directly on items.

**This may need to look different in some classrooms/circumstances. Work within each building to devise best practices that are manageable to those situations.**
